Problemen met Dicamba en met de drift daarvan in de USA:

Onze opmerking: 200 jaar oude cypressen zijn erg verzwakt en dreigen te sterven in de door de drift van Dicamba alsmede vele andere bomen en gewassen in de USA die daar niet tegen bestand zijn gemaakt. En wij zouden die gentech sojabonen die daar tegen bestand zijn gemaakt moeten eten?  
Nee bedankt!

Quotes:

Rogue Weedkiller Vapors Are Threatening Soybean Science

“Dicamba doesn't always stay where it belongs — even new versions of the chemical that have been reformulated to avoid this problem. All over the country, it's been evaporating and floating across the landscape, damaging vegetation that doesn't have those special dicamba tolerance genes. The victims include peach trees, tomato gardens, and....”MORE historic cypress trees. 53

A Drifting Weedkiller Puts Prized Trees At Risk  
September 27, 2018 4:09 PM ET

Dicamba hasn't killed the trees in the lake, but Hayes is convinced that the chemical has weakened them. And new cypress trees can't sprout and grow in the water. The trees that make Reelfoot Lake what it is — if they die, they're gone forever, he says.

A Wayward Weedkiller Divides Farm Communities, Harms Wildlife  
October 7, 2017 5:52 AM ET

"My heart just came up in my throat, thinking, 'Oh my gosh, we've got a real problem,' " Wildy says. "He was seeing the telltale symptoms of dicamba damage. Apparently, dicamba fumes had drifted into his farm from fields up to a mile away where neighbors had sprayed the chemical on their new dicamba-tolerant soybeans and cotton." October 7, 2017

Monsanto Attacks Scientists After Studies Show Trouble For Weedkiller Dicamba

"The new "low volatility" versions of dicamba didn't stay where they belonged. They drifted into nearby fields, damaging crops there — mostly soybeans, but also vegetables and orchards. There were reports of damage from Mississippi to Minnesota, but the problem was worst in Arkansas, Missouri and Tennessee."

4. Conclusions and recommendations

Quote gezamenlijke verklaring van de VS en de EU na het bezoek van voorzitter Juncker aan het Witte Huis (2018). "Wij zullen ook streven naar minder handelsbarrières en naar meer handel in diensten, chemicaliën, farmaceutische (persoonlijke voetnoot: ook GMOs) en medische (idem) producten en (idem GMO)-sojabonen." Dus het gaat zowiezo door, doch dit is Repressieve Tolerantie en geen democratie meer! [http://europa.eu/rapid/press-release\\_STATEMENT-18-4687\\_nl.htm](http://europa.eu/rapid/press-release_STATEMENT-18-4687_nl.htm)

Het EVRM waarborgt in art. 2 het recht op leven en in art. 8 het recht op respect voor het privé- en familieleven. Het Europees Hof heeft in meerdere uitspraken beslist dat bepaalde industriële toepassingen een inbreuk op art. 2 en 8 van de Rechten van de Mens zijn. Deze giftige GG sojabonen, bestand tegen 3 verdachte herbiciden mogen niet op onze EU markt komen!
